

BOOKLET

Find your book, your way.

Product Definition & Feature Brief

Prepared by Maxwell Daley

The Problem

With millions of books available, finding the right one has never been harder. Readers today face three core frustrations:

Discovery is broken

- Existing platforms suffer from the "cold start" problem — algorithms take too long to learn a user's taste
- Generic best-seller charts and popularity-driven recommendations don't reflect personal taste
- AI tools like ChatGPT lack the book-specific knowledge to give truly tailored suggestions

Apps are fragmented

- Readers use one app for discovery, another for tracking, and separate browser tabs for library availability
- Most book apps are dated and lack the social features today's readers expect
- No single platform bridges discovery, acquisition, and community

Safety gaps & isolation

- Existing platforms fail to provide trigger warnings or age-appropriateness ratings
 - Reading has become isolated — readers crave a space to share and connect without leaving their discovery app
-

The Solution: Booklet

Booklet is an AI-powered reading companion that bridges the gap between discovery and acquisition. By combining a Vibe-based onboarding system with robust safety filters and social connectivity, Booklet eliminates decision fatigue and ensures every recommendation is safe, accessible, and perfectly aligned with the reader's taste.

 **AI-First**

 **All-in-One**

 **Safe**

 **Social**

Competitive Advantages Over Goodreads

Goodreads is the dominant book platform — but it was built as a catalog tool and bolted on recommendations later. Booklet is built recommendation-first, with features Goodreads has never offered.

Feature	Booklet	Goodreads
Vibe Quiz Onboarding	✔ Instant personalization on first launch	✗ Manual book rating over time
Recommendation Focus	✔ Core product purpose	✗ Added on after the fact
AI Chat for Books	✔ Conversational discovery (Pro)	✗ Not available
Likelihood Score	✔ Every book scored for your taste	✗ No match scoring
Trigger Warnings	✔ Built in natively	✗ Not available
Age/Suitability Ratings	✔ Available for parents & educators	✗ Not available
Library Integration	✔ Place holds directly in-app	✗ Not available
"Already Read" Filter	✔ Automatically excluded from recs	✗ Only if manually shelved
Page Count / Level Filter	✔ Granular reader control	✗ Genre only
Friend Activity (Live)	✔ See friends' current book + progress	✗ Passive feed only
Sponsored Ads Format	✔ Tasteful book placements in feed	✗ Standard display ads

Feature Breakdown

Free Tier — Booklet Core

All core functionality is available for free to maximize adoption and grow the user base.

Discovery & Recommendations

- Vibe Quiz onboarding on first launch
- AI recommendations scored by likelihood to enjoy
- Contextual discovery ("If you liked X...")
- Cross-genre and mood-based browsing
- "Already Read" exclusion filter
- Trigger warnings & content safety ratings
- Age & suitability filters

Social & Utility

- See friends' current book & reading progress
- Private reading groups
- Direct library hold placement
- Bookstore & vendor links
- Unlimited shelves (TBR, Reading, Read + custom)
- Profile customization (banners, badges)
- Monthly / yearly reading Wrapped
- Reading streaks & goals
- Genre breakdown analytics
- Sponsored book placements (tasteful, feed-native)

Booklet Pro — Premium Tier

Pro unlocks powerful tools for serious readers who want to go deeper.

Booklet AI Chat (Flagship Pro Feature)

- Conversational AI that knows your reading history and taste
- Natural language queries: "Something cozy but dark, under 300 pages"
- Context-aware: "I'm in a reading slump — what should I try?"
- Author and series deep-dives on demand

Advanced Reader Insights

- Reading personality type (e.g. "You're a Binge Reader")
- Predicted finish time based on your reading pace
- Export reading list as PDF or CSV

Pro Experience

- Ad-free — no sponsored book placements, 100% organic recommendations

- Pro badge on community profile
- Early access to new features

Suggested Pricing

- \$3.99 / month
- \$29.99 / year (saves ~37%)

Why It Works

Less than Spotify — low-stakes for Gen Z
Annual plan boosts long-term retention

Monetization Strategy

Booklet has two complementary revenue streams designed to feel premium even at the free tier.

Sponsored Book Placements

Free Tier Revenue

- Publishers and authors pay to feature books in-feed
- Clearly labeled but feed-native — no pop-ups or banners
- Highly targeted: ads reach active readers who want to see books
- Feels premium — consistent with app's recommendation UI
- Pro subscribers see zero sponsored placements

Booklet Pro Subscription

Recurring Revenue

- \$3.99/mo or \$29.99/yr
- AI Chat is the flagship upgrade driver
- Ad-free experience adds trust for power readers
- Analytics features reward habitual users
- Annual plan locks in retention

Target Market

Primary — Digital-First Readers

Ages 13–40 | Gen Z & Millennials

- Avid readers and students overwhelmed by generic lists
- Relies on TikTok/Instagram for recs but wants a dedicated tool
- Values efficiency, mental safety (trigger warnings), and peer validation
- Wants to find books AND locate them at a library immediately

Secondary — Parents & Educators

Seeking safe, vetted discovery for younger readers

- Prioritizes trigger warnings and age ratings
- Uses reading level filters to match books to children
- Wants a tool they can trust to recommend appropriate content
- Values the private reading group feature for classroom use

- Social media user who thinks of reading as a communal activity

Conclusion

Booklet is an AI book recommendation app for avid student readers to help them find books that they want to read, in a way they want to find them. With its social design and AI-powered discovery, Booklet brings together everything a modern reader needs — personalized recommendations, real-time friend activity, and direct library access — all in one place. No more jumping between apps, no more generic suggestions, and no more missing out on books that were made for you. Booklet doesn't just help you find your next read; it learns who you are as a reader and grows with you.
